

**Led by Nurse Practitioners.**

Why is this important? A nurse practitioner (NP) can make medical diagnoses, perform physical examinations, treat illnesses, order diagnostic tests, and has experience communicating with doctors. This adds an extra level of care and knowledge to our services. All Ready2Nurse patients are assessed by an NP when they begin care with us. The NP oversees all care.

**Helping one family at a time, with dignity, when you need us.**

When we experience an adverse health event--a lingering illness, a chronic condition, recovery from surgery--we often turn to our family and friends for help. Caring for a loved one with incapacitating health challenges can be overwhelming for caregivers. We help families avoid stress and burnout while seeing that everyone gets the care they need.

**Culturally sensitive, multilingual care.**

We respect the cultures, values, and beliefs of our patients, carefully considering these factors when we develop care plans. We offer care in English, Mandarin, Vietnamese, Spanish, Tagalog, and Taiwanese--without using translators.

**Immediate response to referrals.**

**MEDICARE/MEDI-CAL PAY UP TO 100%**  
*for qualified patients*

If you are unsure if Medicare, Medi-Cal, or your insurance covers our services, call us. Our specialists will help you determine what benefits apply.

## Chronic Disease Management

*including Mediset service*

Sleep, exercise, a healthy diet, and medication adherence are vital to managing a chronic disease. We work with your physician to customize a plan of care for your condition.

- Diabetes Type I or II
- Hypertension
- Congestive Heart Failure
- Chronic Obstructive Pulmonary Disease
- Oncologic Etiologies
- Obesity
- End Stage Renal Disease

## From Hospital to Home - Transitional Care Program for Adults and Pediatrics

Our professionals work with your physician to ease the transition from facility to home. We may even be able to meet in the facility before you come home. Transitional care may include:

- Home IV Infusions
- Wound & Ostomy Care
- NG-tube Feeding
- Trach & Vent Care

## In-Home Rehab

- Cardiopulmonary
- Cardiac
- Post-Surgery Care
- Neurological
- Fall Prevention
- Stroke

## Private Duty Nursing

When your medical and non-medical needs fall outside the limits of health insurance, consider our private duty nursing services.

## Prenatal & Postpartum Support

Our lactation specialists and nurse practitioners offer support before birth and after, and for infertility treatments.

- Lactation Support and Newborn Care
- Episiotomy & Caesarean Surgical Wound Care
- Infertility Injection Skill Support

## Memory Care

We offer compassionate, respectful support for those with dementia and their families.

- Music Therapy
- Sleep Management
- Nutritious Diet to improve brain and neuron functions

## Longevity Clarity

The aim of this program is early prevention and empowerment of patients and families.

- In-home Annual Comprehensive Physical
- Support and Education

## Mental Health Support

Our experienced behavioral aides provide safety and support during psychiatric episodes. These services benefit those with autism, bipolar disorder, depression, and anxiety.
